

**Subject:** Stromberg Zenith 150 CD 3 carburettor

**Affected engine models:** All engines models

**L 2000 E0  
L 2000 EA  
L 2000 EC  
L 2000 DA**

**Background information:** Improvement of mixture quality in the partial load range

**Priority:** None; measures are taken at the time of repairs, overhauls and in series production.

**Compliance:** The engines in the above-mentioned series will be equipped with newly configured carburettors. The bore of the main jet has been increased in these carburettors, and a different metering needle is used. This metering needle carries the designation B2BA.

**Remarks:** The engine performance remains unchanged
